elōs™ technology

ReFirme™

achieve tight & firm skin without downtime

The Refirme skin tightening procedure, via wrinkle reduction, features revolutionary elōs technology to comfortably achieve a more youthful, tightened and toned appearance without downtime.

We're proud to offer elōs, the first and only technology that uses combined energies to effectively and gently tighten your skin.

Refirme treatments

Effectively treat sagginess under the eyes and brow lines.

Anti-aging solution for smile lines and cheek areas.

Tighten skin around the neck.

Skin before Refirme skin tightening procedure.

Skin after Refirme skin tightening procedure.

How does Refirme skin tightening work?

The combined bi-polar radio frequency and light energies of elōs technology precisely heat the dermal tissue within the target treatment area. This stimulates collagen production and produces a firming effect in lax skin. Fine wrinkles are reduced, noticeable lifting can be observed and the texture of your skin becomes smoother, more luminous and toned.

When can I expect to see results?

Most patients see gradual and cumulative results throughout the Refirme skin tightening treatments. The total number of required treatment sessions depends on your skin's condition. Schedule a consultation to establish your personalized treatment schedule.

Is Refirme skin tightening right for me?

elōs technology enables Refirme skin tightening to be a safe and effective solution for all skin types.

Does it hurt?

Refirme is a gentle, comfortable treatment requiring no downtime. Many patients return to normal activities immediately after the treatment. Cooling of the skin's surface provides enhanced safety and additional comfort.

How much does it cost?

Treatment costs vary. Schedule a personalized consultation for more details.
